

## DBOND Offsite Backup

### 1. 什么是异地备份/ What is Offsite Backup?

任何企业组织, 由于经营者的失误、硬盘故障、病毒、自然灾害、盗窃或丢失等原因, 都可能很轻易地造成数据灾难性的遗失, 使得企业处于危险之中。异地存储备份数据的方案是一种安全、简便、廉价、替代了传统备份方式的备份解决方案。

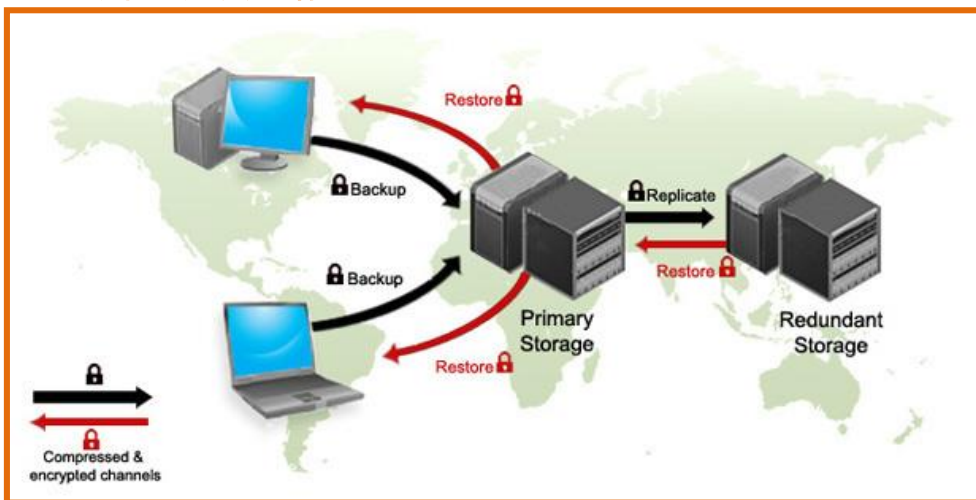

In organizations, Any Decision Mistake, hard disk error, virus, natural disasters, Stealing and Losing may cause fatal losses of data. It brings a tremendous risk to corporate. Offsite backup is a cost-effective, safe and simple backup solution instead of traditional way.

### 2. 异地备份带给您的获益/ The benefits of Offsite Backup

4 个原因异地备份为您创造价值/ Offsite backup bring business values in 4 reasons:

### 3. 鼎邦的服务与功能特色/ DBond featured list

终端可以是单机, 服务器, Exchange。  
Backup Targets can be standalone computers, servers and Exchange.

备份服务器集群位于上海。  
Backup Server Clusters are located in Shanghai.

分散式备份 + 集中式管理方案  
Distributed Backup + Central Management Solution

**技术:** 异地备份使用增量备份的技术。这意味着 1G 容量的 PST 文件中有 200K 发生了更新, 那么仅有这 200K 的内容会进行异地备份。

file that 200KB of the file changed then ONLY the 200 KB will be backed up.

**安全:** 数据将通过加密的方式进行备份。客户能够在备份数据前自己选择加密的方式。但要承担遗忘密码的风险。

**Security:** The data is encrypted during the setup process. This is way more secure in comparison to synch software because data is encrypted by the client Before transmitted to the server.

**压缩:** 文件备份时将以至少 50% 的压缩率进行压缩处理。这个过程不会影响到客户端单机或服务器的性能, 压缩比率主要由文件类型决定。

**Compression:** Ability to compress files with at least a ratio of 50% on average. The compression processes should not effect PC performance. Compression heavily depends on the
